OAH DEFECT RECOGNITION & REPORTING COURSE SUPPLEMENTAL INTERACTIVE CD-ROM

(for Microsoft Windows only)

ORDER FORM

Who is this CD for? For all home and building inspectors and potentially anyone involved in the inspection of buildings. No longer does the student merely absorb the material... this CD-ROM on defect recognition allows the viewer to actually take part in the process, selecting what information they need and have it presented to them in the form of text, animation, and still images. It is also a good optional study tool for the OAH Defect Recognition & Reporting Course, and simply enhances the learning experience.

SYNOPSIS OF COURSE

The OAH Defect Recognition & Reporting program is unique in North America. The focus of the course is analysis and recommendations. There are eleven modules:

Legal Responsibilities of the Home Inspector • Building Safety Issues • Building Envelope • Roofing • Basement Water Infiltration • Electrical Defects • Heating, Cooling & Ventilation System Defects • Plumbing • Structures & Structural Defects • Environmental Issues • Report Writing

OBJECTIVES

To understand the methodology and limitations of an OAH Standard inspection and the expectations of the home inspector. To develop effective verbal and written communication skills. To understand the relative importance and prioritization of defects. To understand the importance of referring specialized evaluation when conditions are beyond the scope of the home inspector.

The CD is also available at upcoming OAH Defect Recognition & Reporting Courses or it can be ordered through the OAH office by using this Order Form. Please allow for 2-3 weeks delivery time.
